## Make-a-Beak Craft

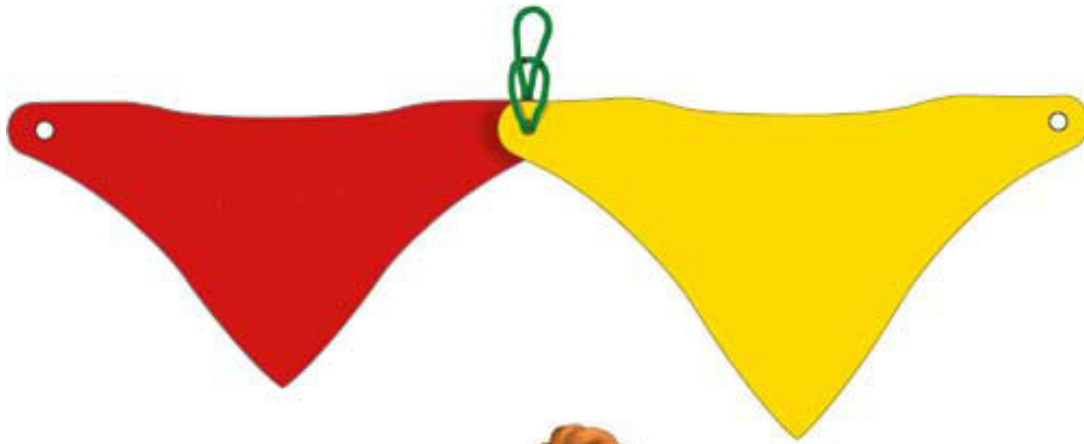

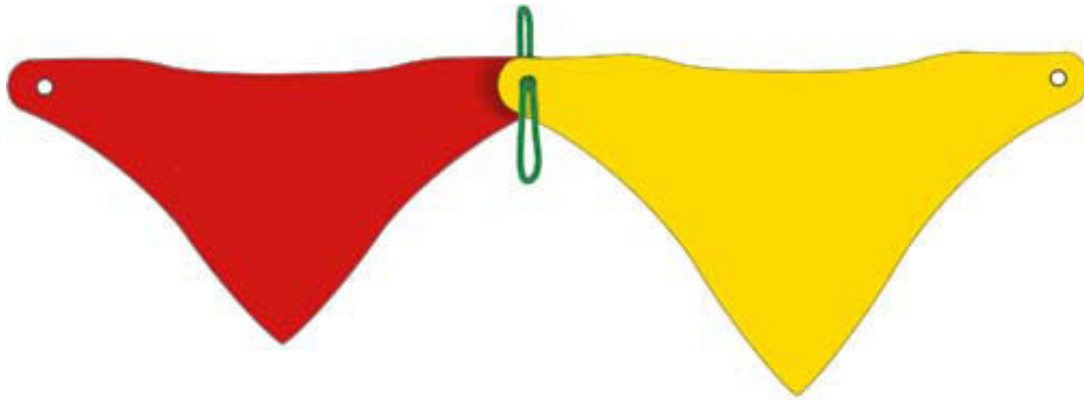

### You will need:

- Scissors (with adult supervision if necessary)
- Construction or heavyweight paper
- 2 thin rubber bands (2½ inches)
- Optional: a paper punch

### Directions:

1. Trace the two beak shapes on the next page onto heavy weight paper and cut them out with the scissors.
2. Punch holes where shown.
3. Line up the two peices as shown at top left. Put a rubber band in the hole as shown.
4. Slip one end of the rubber band through the other end. Pull to tighten but not so tight as to bend the paper.
5. Match the two remaining holes together and repeat the process.
6. Wrap the rubber bands around each ear.
7. Now start squawking and flapping those wings!
